Loading Data from File

Sung Kim <hunkim+ml@gmail.com>

Code: <https://github.com/hunkim/DeepLearningZeroToAll/>

<https://github.com/hunkim/DeepLearningZeroToAll/>

Loading data from file

`data-01-test-score.csv`

```
# EXAM1,EXAM2,EXAM3,FINAL
73,80,75,152
93,88,93,185
89,91,90,180
96,98,100,196
73,66,70,142
53,46,55,101
```

```
import numpy as np
```

```
xy = np.loadtxt('data-01-test-score.csv', delimiter=',', dtype=np.float32)
x_data = xy[:, 0:-1]
y_data = xy[:, [-1]]
```

```
# Make sure the shape and data are OK
```

```
print(x_data.shape, x_data, len(x_data))
```

```
print(y_data.shape, y_data)
```

https://github.com/hunkim/DeepLearningZeroToAll/blob/master/lab-04-3-file_input_linear_regression.py

Slicing

```
nums = range(5)      # range is a built-in function that creates a list of integers
print nums           # Prints "[0, 1, 2, 3, 4]"
print nums[2:4]       # Get a slice from index 2 to 4 (exclusive); prints "[2, 3]"
print nums[2:]        # Get a slice from index 2 to the end; prints "[2, 3, 4]"
print nums[:2]        # Get a slice from the start to index 2 (exclusive); prints "[0, 1]"
print nums[:]         # Get a slice of the whole list; prints "[0, 1, 2, 3, 4]"
print nums[:-1]       # Slice indices can be negative; prints "[0, 1, 2, 3]"
nums[2:4] = [8, 9]    # Assign a new sublist to a slice
print nums           # Prints "[0, 1, 8, 9, 4]"
```

Indexing, Slicing, Iterating

- Arrays can be indexed, sliced, iterated much like lists and other sequence types in Python
- As with Python lists, slicing in NumPy can be accomplished with the colon (:) syntax
- Colon instances (:) can be replaced with dots (...)

```
a = np.array([1, 2, 3, 4, 5])
# array([1, 2, 3, 4, 5])

a[1:3]
# array([2, 3])

a[-1]
# 5

a[0:2] = 9

a
# array([9, 9, 3, 4, 5])
```

```
b = np.array([[1, 2, 3, 4], [5, 6, 7, 8], [9, 10, 11, 12]])
# array([[ 1,  2,  3,  4],
#        [ 5,  6,  7,  8],
#        [ 9, 10, 11, 12]])

b[:, 1]
# array([ 2,  6, 10])

b[-1]
# array([ 9, 10, 11, 12])

b[-1, :]
# array([ 9, 10, 11, 12])

b[-1, ...]
# array([ 9, 10, 11, 12])

b[0:2, :]
# array([[1, 2, 3, 4],
#        [5, 6, 7, 8]])
```

Loading data from file

`data-01-test-score.csv`

```
# EXAM1,EXAM2,EXAM3,FINAL
73,80,75,152
93,88,93,185
89,91,90,180
96,98,100,196
